

Mille-Plug™

& Mille-Anchor™ cable tie anchor™

Mille-Plug General Overview

An excellent and strong fixing for Plasterboard/Wallboard. Great for use in Aircrete (AAC) with density less than 400kg/m³. Designed to take a wider range of screw sizes than any other fixing on the market!

Applications

Fixing could not be easier just simply make a hole in your plasterboard with a No.2 recessed screwdriver or 6mm (1/4 inch) drill and screw the Mille-Plug home. The Mille-Plug can be used in soft Aircrete blocks (with density lower than 4.0kg/m³). Make a hole with a 6mm (1/4 inch) drill or No.2 recessed screwdriver and simply screw the Mille-Plug in.

Key Benefits

- Easily fixed into plasterboard.
- Takes a size 4-10 gauge screw.
- Superb pull out tolerances.
- Use also in soft Aircrete (AAC) block.

Cable Tie Anchor General Overview

This simple hammer in ANCHOR provides the tradesman or handy amateur with a cost-effective solution for securing electrical trunking & cables onto lightweight aerated concrete block & brickwork.

Key Benefits

- Easily hammered into block work.
- Superb pull out tolerances.
- Can be used through rendered block work (pre-drilling of rendering required).
- Can be used in normal brick work or any hard material by pre-drilling 7mm (1/4 inch) dia hole X 45mm (1 3/4 inch) deep, then hammer in fixing.
- Can be used to secure metal or plastic trunking.
- The Mille-Tie fits perfectly into this anchor.
